Project Office Available: Yes

**A**LTHOUGH TODAY THERE MAY BE A MULTITUDE OF PLACES WHERE YOU could bring your yacht for a refit, there are still only a handful of places that provide professionalism and excellence in workmanship. Arredamenti Porto (AP) is such a place and has been providing such services for over 20 years. AP specialises in quality refits of yachts of 40 m or greater. You can bring your yacht and your list of needs and desires to AP with the assurance that expectations will be met or exceeded. This is not just idle boast, for AP has notable references to justify such a claim.

The technical office at AP is staffed by very talented individuals who have been working together now for over ten years. Their collective base of knowledge and positive attitude keep Arredamenti Porto's facilities buzzing with a continuous stream of new business. Their goal is to routinely exceed customer expectations thereby ensuring complete satisfaction. Arredamenti Porto is situated in the centre of the port district and is surrounded by the best and most experienced Marine Industry companies in Genoa, who's expertise is called on when necessary.

Exceptional quality and timeliness in its refits is only one part of the relationship one gets with Arredamenti Porto. What really makes working with AP special is the way they make you feel like family. The AP team goes out of its way to make each customer's stay in Genoa very special. The shipyard is located close to the heart of historic Genoa and within walking distance there are historical museums, old cathedrals, great restaurants and lots of shopping. Mr. Costaguta, a local Genoese and the Director of AP, goes to great lengths to ensure that each yacht's crew receives the personal attention they require to feel at home in Genoa.

In Arredamenti Porto's 20+ years of refit and new interiors construction, it has met and overcome many challenges in order to meet or exceed the needs of each and every yacht owner. It continuously seeks out new and more complicated projects. AP started its business primarily as a new interiors company. Due to the demand from owners wanting new interiors AP began doing general refit work while also building the new interiors. Through such efforts, AP has developed its own proprietary prefabrication system of measuring and building each yacht's required furniture in one of its off-site workshops and then disassembling and remounting the completed furniture on board. This unique system provides AP with the ability to work on several projects simultaneously, without requiring the yacht to be present in the shipyard.

Over the years AP has worked with some of the most important yacht owners in the world – and these owners return time and again!
